Art Unit: 2625

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 10, 11 – 14, 28 – 31 and 32 - 33, drawn to steganographic encoder for encoding auxiliary data in an image, classified in class 382, subclass 100.
 - II. Claims 15 – 19, 20 – 23, 24, - 25 and 34 - 37, drawn to maintaining database and file management system for steganographically encoded data, classified in class 707, subclass 104.1.
 - III. Claims 26 – 27, drawn to timekeeping function in a camera, classified in class 396, subclass 434.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as steganographic encoder for encoding auxiliary data in an image without maintaining database and file management system for steganographically encoded data therein. See MPEP § 806.05(d).

3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as maintaining database and file management system for steganographically encoded data, without timekeeping function in a camera. See MPEP § 806.05(d).

4. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as steganographic encoder for encoding auxiliary data in an image without without timekeeping function in a camera. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
